ABOUT

I am a **self-taught** web developer with one year of experience. I recently graduated from **Le Wagon**, an intensive Web Development Bootcamp. I am detail oriented and passionate about accessible and effective front-end implementation.

I am ambitious and highly motivated to further my web development skills.

SOFT SKILLS

After a decade of experience in hospitality, I have proven myself to be a resourceful and adaptable team player focused on active communication and efficient problem-solving.

These transferable skills along with my detail-oriented approach would make me an asset.

SKILLS

HTML, CSS, JavaScript, Render, GitHub, SQL, Yarn, NPM, Ruby, Ruby on Rails, React, Figma

CERTIFICATIONS

- Le Wagon
- Zero to Mastery Academy
- She Codes

ADDITIONAL LANGUAGES

Italian
Russian
Romanian

EDUCATION

Web Development @ Le Wagon – (Jul-Sep 23)

In this full-time, BCS-accredited in-person bootcamp, I collaborated with other web developers learning project development, scheduling, pitching ideas, designing, effective coding using Ruby, Ruby on Rails and APIs utilisation, to deliver mature solutions for a refined user journey.

Enriching my experience in ideation, building and navigating full-stack web projects with everyday troubleshooting through high-paced teamwork.

Complete Web Developer @ Zero To Mastery (Jan- Apr 23)

I dived headfirst into this full-stack development online bootcamp to establish a solid foundation in crafting visually engaging web apps using clean code techniques. Some of the tools that we covered include:

AJAX – Bootstrap – Node.js – Command Line – React – PostgreSQL – SQL – Authentication and Authorisation principles/methods – Scalable infrastructure production and deployment.

She Codes (Sep-Nov 2022)

Through this female only course supporting women in tech, I gained skills in developing responsive design utilising vanilla HTML and CSS.

KEY PROJECTS

[Wavelength](#)

As part of the Le Wagon bootcamp, our team of five collaborated well, leveraging our individual strengths to create a web application called Wavelength. The platform allows users to share music with friends daily, creating meaningful memories and gaining insights into each other's musical preferences.

- Utilising Ruby on Rails, SCSS components, JavaScript, along with APIs.

My main contribution was on front end and using my communication skills to foster collaboration between teammates.

Yacht forever

A collaborative team effort in which we built a platform that is designed to facilitate smooth booking for luxurious yachts. Inspired by Airbnb's philosophy and design.

- Crafting a robust full-stack application, using Ruby and CSS.

I lead the project with its idea generation and design.

RECENT WORK EXPERIENCE

Guest Experience Host @ Fora & TOG London – [11/2018 - 10/2022]

- Organising and managing regular corporate events.

- As a guest experience host at a high-end coworking space, I've conducted informative tours and provided comprehensive assistance, adapting to the unique needs and preferences enhancing the experience of our clients.

- I took pride in my ability to welcome visitors warmly, managing calls and emails, ensuring clear and effective communication.

- I demonstrated resourcefulness by conducting technical checks and providing IT support as well as managing meeting rooms

- I value diverse perspectives and fostering camaraderie. Achieving shared goals and enhancing team dynamics with open dialogue and leading by example.
